Version 2.7 of the SuperSail Marine Alarm App:

Our new Version 2.7 of the SuperSail Marine Alarm App will be released to AppStore and PlayStore within a few days.

New functions and features:

- The alarm is now activated and deactivated by use of the new slide button. When activated it indicates "ALARM ON" and when deactivated it indicates "ALARM OFF".
- It is now possible to see the temperature in both Celsius and Fahrenheit. Just push the temperature icon and select C or F
- The battery level in the wireless sensors are measured every time the sensor is activated (i.e. every time you pass by the movement sensor, opens a hatch etc. - both when the alarm is ON and OFF) and an SMS is sent if the battery level in a wireless sensor is too low. However, we still

recommend changing batteries in all wireless sensors once every year in order to ensure optimal signal and security.

Remember:

- The Alarm Status button is shown with a <u>red ikon</u>, if the connection to the alarm is lost, i.e. no GSM signal or the alarm has run out of power.
- The User Settings button is shown with a <u>red ikon</u> in case no mobile telephone numbers are entered the alarm recipient list.
- If a temperature sensor is attached, the temperature ikon will be <u>shown in red</u>, in case the temperature is not updated, i.e. if the sensor has run out of battery.

What to do:

- From AppStore for iOS telephones and from PlayStore for Android telephones you will **receive a notification** when the new SuperSail Version 2.7 App. is available.
- Your settings will **not be changed** when you install the new App.
- When the App. is installed you just **use your present login**.
- We **recommend that you update to the new Version 2.7** in order to ensure that the latest security updates will be applied.

Our many wireless sensors can easily be retrofitted and thereby further improving the monitoring of your yacht. Please visit us at our new website:

<u>Winter 2019-2020 special offer to our SuperSail Marine Alarm users:</u>

The winter 2019 is getting closer and therefore we have an exclusive winter offering for our SuperSail users - A superSail wireless temperature sensor with a **15% discount, to 845 DKK (115 EUR).**

A **SuperSail temperature sensor** which shows the actual temperature in a specific location in your yacht, can give you an **"overheat"** or **frost alarm** – you determine the temperature limits.

You order the temperature sensor using: info@super-sail.dk.

You are indeed welcome to contact us in order to get information and advice with respect to all the possibilities you have as a SuperSail Marine Alarm user.

We are also very interested in your feed-back and good ideas – so do not hesitate to contact us!

SuperSail wishes you a good and safe autumn and winter and look forward to the sailing season 2020!
